The DNA sequence encodes a protein which may provide a plant or its progeny with at least partial resistance against an comycete infection caused by Phytophthora infestans. The invention may be useful for the development of compounds with a fungicide activity. The DNA sequence of the invention encodes an Rpi-blb protein comprising 970 amino acids. The nucleic acid, vector, cell, protein or binding molecule is useful for providing a plant or its progeny with resistance against an comycete infection such as late blight (a disease of major importance to production of Solanaceae such as potato and tomato cultivars). The present sequence is that of a protein which was used for homology purposes in the exemplification of the invention.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 Sequence 979 AA;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    Local Similarity

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   S
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  밁
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               밁
                                                                                     This invention relates to novel isolated polynucleotides that confer resistance against late blight caused by the comycete pathogen Phytophthora infestans, which threatens both tomato and potato crops. Specifically, it refers to a gene cluster (namely Rpi-blb) that encodes leucine-rich repeat (LRR) proteins identified in Solanum bulbocastanum, and which cause disease resistance to bacteria, fungi, nematodes etc. These R genes, namely Rpi-blb, RGC1-blb, RGC3-blb and RGC4-blb, can be described as plant growth regulants. They are useful in providing resistance to Phytophthora infestans, especially in Solanum tuberosum (potato) plants to protect against comycete infection or to demonstrate disease susceptibility. Resistance can be conferred by transformation of existing potato and tomato cultivars with the gene, a procedure that is more straightforward and faster than conventional introgression breeding. This polynpeptide sequence is the Solanum bulbocastanum Rpi-blb protein
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 New resistance gene conferring resistance against an oomycete useful for producing plants, especially potatoes and tomatoes, against oomycete pathogens such as Phytophthora infestans.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  WPI; 2003-714439/68.

The DNA sequence encodes a protein which may provide a plant or its progeny with at least partial resistance against an comycete infection caused by Phytophthora with a fungicide activity. The DNA sequence of the invention encodes an Rpi-blb protein comprising 970 amino acids. The nucleic acid, vector, cell, protein or binding molecule is useful for providing a plant or its progeny with resistance against an comycete infection such as late blight (a disease of major importance to production of Solanaceae such as potato and tomato cultivars). The present sequence is that of the S bulbbocastanum Rpi-blb protein of the invention.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               plant disease; oomycete infection; Phytophthora infestans; fung. ```

This invention relates to a novel DNA sequence in the field of plant disease, in particular comycete infections. The DNA sequence encodes a protein which may provide a plant or its progeny with at least partial resistance against an comycete infection caused by Phytophthora infestans. The invention may be useful for the development of compounds with a fungicide activity. The DNA sequence of the invention encodes an Rpi-blb protein comprising 970 amino acids. The nucleic acid, vector, cell, protein or binding molecule is useful for providing a plant or its progeny with resistance against an comycete infection such as late blight (a disease of major importance to production of Solanaceae such as potation and tomato cultivars). The present sequence is that of a protein which was used for homology purposes in the exemplification of the invention. Example 7; SEQ ID NO 63; 98pp; English.

This invention relates to a novel DNA sequence in the field of plant disease, in particular comycete infections. The DNA sequence encodes a protein which may provide a plant or its progeny with at least partial resistance against an comycete infection caused by Phytophthora infestans. The invention may be useful for the development of compounds with a fungicide activity. The DNA sequence of the invention encodes an Rpi-blb protein comprising 970 amino acids. The nucleic acid, vector, cell, protein or binding molecule is useful for providing a plant or its progeny with resistance against an comycete infection such as late bligh
                                                                                                                                                                                                                   New isolated or recombinant Rpi-blb nucleic acids and proteins, useful for providing members of the Solanaceae family e.g. Solanaceae tuberosum with resistance against comycete infection.
                                                                                                                                                                                                                                                                                                                                                                                            07-FEB-2003;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   plant disease; oomycete

                                                                                                                                                                                                                                                                                                  This invention relates to novel isolated polynucleotides that confer resistance against late blight caused by the comycete pathogen Phytophthora infestans, which threatens both tomato and potato crops. Specifically, it refers to a gene cluster (namely Rpi-blb) that encodes leucine-rich repeat (LRR) proteins identified in Solanum bulbocastanum, and which cause disease resistance to bacteria, fungi, nematodes etc. These R genes, namely Rpi-blb, RGC1-blb, RGC3-blb and RGC4-blb, can be described as plant growth regulants. They are useful in providing resistance to Phytophthora infestans, especially in Solanum tuberosum (potato) plants to protect against comycete infection or to demonstrate disease susceptibility. Resistance can be conferred by transformation of existing potato and tomato cultivars with the gene, a procedure that is more straightforward and faster than conventional introgression breeding. This polynophtide sequence is the Solanum bulbocastanum RGC1-blb protein.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        New resistance gene conferring resistance against an oomycete pathogen, useful for producing plants, especially potatoes and tomatoes, resistar against oomycete pathogens such as Phytophthora infestans.
                                                                                                                                                                                                                                     Sequence
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              Example 5; SEQ ID NO 43; 86pp; English.

The DNA sequence encodes a protein which may provide a plant or its progeny with at least partial resistance against an comycete infection caused by Phytophthora infestans. The invention may be useful for the development of compounds with a fungicide activity. The DNA sequence of the invention encodes an Rpi-blb protein comprising 970 amino acids. The nucleic acid, vector, cell, protein or binding molecule is useful for providing a plant or its progeny with resistance against an comycete infection such as late blight (a disease of major importance to production of Solanaceae such as potato and tomato cultivars). The present sequence is that of a protein which was used for homology purposes in the exemplification of the invention.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         07-FEB-2003; 2003US-00360522
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       Solanum bulbocastanum.

The DNA sequence encodes a protein which may provide a plant or its progeny with at least partial resistance against an comycete infection caused by Phytophthora infestans. The invention may be useful for the development of compounds with a fungicide activity. The DNA sequence of the invention encodes an Rpi-blb protein comprising 970 amino acids. The nucleic acid, vector, cell, protein or binding molecule is useful for providing a plant or its progeny with resistance against an comycete infection such as late blight (a disease of major importance to production of Solanaceae such as potato and tomato cultivars). The present sequence is that of a protein which was used for homology purposes in the exemplification of the invention.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       5
                              This invention relates to a novel DNA sequence in the field of plant disease, in particular comprete infections. The DNA sequence encodes a protein which may provide a plant or its progeny with at least partial resistance against an comyrete infection caused by Phytophthora infestans. The invention may be useful for the development of compounds with a fungicide activity. The DNA sequence of the invention encodes an Rpi-blb protein comprising 970 amino acids. The nucleic acid, vector, cell, protein or binding molecule is useful for providing a plant or its progeny with resistance against an comycete infection such as late blight (disease of major importance to production of Solanaceae such as potato and tomato cultivars). The present sequence is that of a protein which was used for homology purposes in the exemplification of the invention.
                                                                                                                                                                                                                                                                                                                                                       New isolated or recombinant Rpi-blb nucleic acids and proteins, useful for providing members of the Solanaceae family e.g. Solanaceae tuberosum
                                                                                                                                                                                                                                                                                                Example 7; SEQ ID NO 59; 98pp; English.
